Errata: Security Alerts, Bugfixes, and Enhancements

Red Hat releases Errata Alerts in three categories: Security Alerts, Bug Fix Alerts, and Enhancement Alerts. Each Errata Alert is comprised of a summary of the problem and the solution, including the RPM package(s) required to fix the problem.

The [Red Hat Security Resource Center](#) contains more information including details on [how to contact us](#) about security issues.

Errata Support Period

Red Hat Linux Advanced Server -- Red Hat will provide proactive errata maintenance for Red Hat Linux Advanced Server for a period of at least three years from the date of initial release.

Red Hat Linux -- Beginning with the 8.0 release, Red Hat will provide errata maintenance for at least 12 months from the date of initial release. At certain times, Red Hat may extend errata maintenance for certain popular releases of the operating system. End of Life dates for errata maintenance for currently supported products are listed below:

Red Hat Linux Advanced Server 2.1	May 31, 2005
Red Hat Linux 8.0 (Psyche)	December 31, 2003
Red Hat Linux 7.3 (Valhalla)	December 31, 2003
Red Hat Linux 7.2 (Enigma)	December 31, 2003
Red Hat Linux 7.1 (Seawolf)	December 31, 2003
Red Hat Linux 7.0 (Guinness)	March 31, 2003
Red Hat Linux 6.2 (Zoot)	March 31, 2003
